To Whom It May Concern,

Re: Creating pipelines for T&T and Japan new media; Exporting/Importing cultures across T&T & Japan markets via Japan-inspired gaming & media company – Bustr's request for Sponsored & Guided trip

This introductory letter serves as a prelude to the documents attached.

Greetings! Bustr is an IP-based licensing, development, marketing & distribution company that manages culturally rich projects in media. Our interests align in that we are both passionate about sustainable development of national sectors on a global level. We are here, *in your orbit*, to inform you of our latest ventures & opportunities for cross-culture commerce, network building, & community fostering, in which we believe you may be interested in supporting. These opportunities come in the form of our newly developed/licensed, Caribbean-based media products set for official debut this year starting within Trinidad & Tobago's market. In particular – TWO of our projects, following a market analysis, show great potential to succeed in Japan's market. Coming out of our production-release phase, we hope to be able to export these projects into the Japanese markets where they can maximize their potential, and fulfil the necessary research, data collection & market priming to support our highly appealing IP throughout its next phases of establishing them regionally & internationally, and leveraging the existing awareness/audience base for greater prosperity.

Please see our attached proposals for more information on how you can assist and benefit.
